SUMMARY

A computer science student that has studied in the STEM field in secondary school. Studied computer systems and mathematics, establishing his fundamentals in problem solving and technology. Can utilize team cooperation and communication skills to carry over necessary tasks and learn essential skillsets needed. Has experience in helping in projects that have been accepted in conferences both National and International. Familiar with several industry-ready tools and various languages both low and high level. Very particular with learning and reinforcing growth through experience.

EDUCATION

Cebu Institute of Technology - University

2022-2026

B.S. Computer Science

Cebu, City

- Bass 2 and Presidential OIC of the Koro Teknoy Chorale
- PhilNITS FE April 2025 Certification
- C - Code Chum Certification
- Java - Code Chum Certification
- AWS Academy Graduate - Cloud Foundations
- AWS Academy Graduate - Cloud Architecting
- TOPCIT Level 3 Expertise

Philippine Science High School - Central Visayas Campus

2016-2022

STEM Strand

Argao, Cebu

- Graduated with Honors and with 1 Dean's Lister placement.
- Red Hot Pawns Club Member*
- Participated in the school's very own chess club for 2 years.

WORK

DXForm Technologies

2025

QA Analyst

Cebu, City

- Finished 250 hours of OJT as a Quality Assurance Analyst.
- Helped testing and bug tracking of 4 different company projects.

Opswerks

2026

SRE Intern

Cebu, City

- Finished Internship Program at Opswerks involving SRE work and tech stacks for experience
- Learned Linux, AWS, Kubernetes, Docker & Containers, and SRE other related stacks.

PROJECTS

Bombberman BattleRoyale

2024

- A java multiplayer game that features a fun battle-royale-styled PvP experience.

TakeIt

2024

- An event management and ticketing system that ensures a fluid process on booking and management of events.

DishCover

2024

- A pantry management app that allows easy storage management, expiration date tracking, and inventory.

CropConnect

2024

- A fresh goods e-commerce app that gives farmers the platform to sell their produce and for consumers to directly buy freshly grown products from trusted farmers.

E-Tanom

2024

- An academic-concept startup that aims to lend a helping hand to local farmers to catch up to the trends of the ever-growing and expanding market.

Fusion Rush

2025

- A supplementary learning software that provides AI tutoring services and gamified learning about the Rules of Inference. The system was deployed and tested by students in coordination with selected Discrete Math instructors in the CIT-U CCS department.

Nexchef

- An experimental prototype mobile app that allows users to share their cooking recipes, and record live steps and timers to guide other users as accurately as possible on how to cook their signature dishes.

RESEARCH EXPERIENCE

Fusion Rush: Enhancing Proficiency in Boolean Logic Algebra through Gamification

2026

Researcher

Cebu City

- Worked on an adaptive learning app for boolean rules and logic aimed to help students learn Discrete Math.
- Participating in writing the paper and coding of the project which included software and AI Development.
- The paper was accepted in a Scopus-indexed conference named International Conference on Education and Training Technologies 2026.

Bridging the Gap Between Synthetic and Real Handwriting: Using Visual AI to Accurately Parse Structured Logic Proofs

2026

Researcher

Cebu City

- Worked on a system used to scan, parse, and evaluate validity and scoring of Discrete Math problems, specifically under the Rules of Inference topic.
- Participating in writing the paper and creation of the system which also included software and AI Development.
- Personally presented the paper in the Philippine Computing Science Congress 2026 held in Davao.

The Comparison of Aerated and Non-aerated Hydroponics

2021 – 2022

Researcher

Argao, Cebu

- Worked on a research comparing the performance of aerated against non-aerated hydroponics setups on water spinach plants over the course of a month.
- Facilitated the procurement, conducting, data collection, and conclusion phase of the research.

VOLUNTEERING

Concert for a Cause

2023

- Volunteered to sing in the Bradford Grand Choir for the charity after Typhoon Odette.

NSTP-CWTS Labangon Outreach

2023

- Participated in an outreach giving supplies and donations to the disabled people around Labangon, Cebu area

Easter Cantata

2022

- Volunteered to sing in the Household of Faith Choir Cantata for Easter Sunday.

Christmas Cantata

2022

- Volunteered to sing in the Household of Faith Choir for the Christmas Cantata.

SKILLS & INTERESTS

- **Technical Skills:** Java, C++, C#, C, Django, SQL, MySQL, Postgresql, HTML, JS, React, NextJS, Python, php, AWS, Automata Theory and Formal Languages, Data Structures and Algorithms, Android Studio, UI/UX Designing, Linux, Docker/Containers, Networking
- **Skills:** Full-stack Development, Software Quality Assurance, Planning, Creative Works, Media Editing
